TRENCHLESS MOROCCO 2026

Morocco's underground infrastructure is rapidly evolving to support its growing urbanisation and modernisation efforts. As Morocco expands Trenchless Technology is becoming a crucial solution for environmental, sustainable urban development.

Mission

Our mission is to revolutionise the Moroccan trenchless technology community by promoting the benefits of trenchless technology through an informative and engaging event. We aim to facilitate the exchange of knowledge, ideas, and best practices among industry professionals while showcasing the latest advancements in trenchless technology. Our goal is to raise awareness of the cost-effective and sustainable benefits of trenchless

technology, within the current sector and other sectors that can also embrace the use of such methods and technology. We are committed to delivering an exceptional event that inspires attendees to embrace trenchless technology as the future of underground construction and equips them with the tools and knowledge needed to drive positive change in the industry.

Trenchless Morocco will be hosted in the capital Rabat. Rabat is undergoing significant urban development, including infrastructure expansion and modernisation of utilities such as water, sewage, and telecommunications. The city's commitment to sustainable and innovative construction methods aligns perfectly with trenchless technology applications.

Additionally, Rabat offers proximity to major public institutions, such as ONEE (Water & Electricity National Authority), as well as several key ministries, which encourages the involvement of public players. Rabat is also home to prestigious universities, including the Université Internationale de Rabat (UIR), the École Nationale d'Architecture (ENA), the Université Mohammed VI and the École Mohammadia d'Ingénieurs (EMI).

Conference topics to include but not limited to:

- Latest technical developments in pipe new installation
- Latest technical developments in pipe installation
- Latest technical developments in Inspection and cleaning
- Overview of the current situation and development in national, European and International standards
- Use of Trenchless Technology in the following areas Water, Sewer, Gas, Electricity, Telecoms
- Fibre Optic installation and repair
- Digitalisation in Trenchless
- The use of Drones
- Training and educational courses will also be organised

Trenchless Morocco will target the following areas:

- Municipalities: public works officials, construction and rehabilitation personnel, engineers, senior city staff and elected officials
- Highways Contractors: sewer, water, gas utility, industrial, pipeline, damage prevention and safety
- Consulting Engineers: firms serving the underground infrastructure and industrial markets
- Gas/Electric Utilities: officers, managers, construction, maintenance and rehabilitation personnel
- Pipelines and Energy: officers, managers, construction and maintenance personnel for transmission pipeline construction, rehabilitation and maintenance
- Industrial Facilities: construction and maintenance personnel, engineers and environmental assessment personnel
- Damage Prevention: personnel involved in managing damage prevention and safety issues

Exhibition Showcase

We are excited to present our upcoming tabletop exhibition showcase. This format offers an exceptional opportunity for businesses to showcase their products, services, and innovations to a targeted audience. Our exhibition provides a platform for businesses to engage with potential customers, share industry insights, and build valuable connections. With a focus on delivering high-quality networking opportunities and a professional setting, our tabletop expo provides an excellent environment to connect with key decision-makers and industry leaders. The exhibition provides a cost-effective way to expand your reach, promote your brand, and generate leads. Join us for a productive and engaging event of networking, learning, and growth.
